

Clarocet PM is designed to work quickly with immediate response benefits that last through the night.

Independent clinical research has shown that the ingredients in Clarocet PM aid in the relaxation of the Central Nervous System (CNS) and positively influence neurochemicals associated with healthy sleep function. Studies suggest that, with continued use and active participation in a wellness plan, the ingredients in Clarocet PM may help to:

- Temporarily relieve overactive behaviors such as occasional irritability, restlessness, and nervousness
- Support healthy brain functions, including mental sharpness, memory and concentration
- Promote a healthy neurotransmitter balance
- Maintain general well-being

Usage Instructions: As a dietary supplement, take approximately 30 minutes to one hour before bedtime. Begin with one capsule each evening for the first seven days. If, after the first week, you feel it is necessary to take more than a single capsule, then you may increase your intake, which should not exceed four capsules per night.

Clarocet PM may also be combined with Clarocet NRI, Clarocet ERT and Clarocet CS.

To maintain product's maximum potency, store in a cool, dry place that is away from direct sunlight.

Safety Information

A consultation with a qualified healthcare professional is always recommended before adding Clarocet to your Wellness Plan. In certain instances, a person *must* consult with their primary care physician, including pregnant women or nursing mothers, individuals who have been diagnosed with a serious health issue, or those taking prescription medications.

For adult use only at bedtime. Do not use in conjunction with alcoholic beverages, when driving a vehicle, or while operating machinery.

Tamper Evident: Double safety sealed with an outer shrink-wrap film and an inner-bottle freshness seal. Do not use if either seal is broken or missing.

Keep out of reach of children.
