

Clarocet Junior is a broad spectrum, nutritional-herbal complex that is developed for children and teens between the ages of 7 and 13.

Recent clinical research indicates that very active children may have special dietary needs. Studies indicate that the ingredients in Clarocet Junior aid in the relaxation of the Central Nervous System (CNS) and positively influence vital neurochemical processes. With continued use and participation in a wellness plan, the ingredients in Clarocet Junior may help to:

- Temporarily relieve overactive behaviors such as occasional irritability, restlessness, and nervousness
- Support healthy brain functions, including mental sharpness, memory and concentration
- Promote a healthy neurotransmitter balance
- Maintain general well-being

Usage Instructions: As a dietary supplement, administer one tablet for the first seven days of use. Tablets may be swallowed whole or *crushed* and mixed with water, juice, or a food item such as peanut butter or applesauce. If, after the first week, you or your child feels it is necessary to take more than a single tablet per day, then you may increase his or her intake, which should not exceed four tablets within a 24-hour period. To ensure a consistent usage schedule, establish a time that is convenient for you and your child.

To maintain product's maximum potency, store in a cool, dry place that is away from direct sunlight.

**Dietary Supplement
Sixty (60) Tablets**

Safety Information

A consultation with a qualified healthcare professional is always recommended before administering Clarocet Junior. In some instances you *must* consult with your child's primary care provider, especially if your child has been diagnosed with a serious health issue, if your child is currently taking prescription medications, or if your child has a known history of allergies.

St. John's Wort has been shown to increase some individuals' sensitivity to UV sources, such as artificial light or natural sunlight. Limit excessive exposures to these sources and apply sunscreen with an appropriate level of SPF for your child's skin type when outdoors.

Tamper Evident: Double safety sealed with an outer shrink-wrap film and an inner-bottle freshness seal. Do not use if either seal is broken or missing.

Keep out of reach of children.
