

**SUGGESTED USAGE:** As a dietary supplement, take 1 capsule daily with a fat-containing meal or as directed by your healthcare practitioner.

**HOW IT WORKS:** Lutein is a nutritionally important carotenoid that occurs naturally in brightly colored vegetables, such as spinach and kale. Like many carotenoids, Lutein helps to protect the body from the effects of free-radicals.\* Lutein is especially important in regards to eye health as it is stored within the lens, as well as in the retina where it promotes the integrity and density of the macular pigment.\* Clinical trials have shown that supplementation with FloraGLO® Lutein helps to maintain healthy macular Lutein concentration, where it functions to fortify the eye against free radicals produced by light and oxygen.\* In addition, FloraGLO® Lutein has been shown to support healthy skin hydration and elasticity by enhancing its natural defenses against sun exposure.\*

**CAUTIONS/INTERACTIONS:** None known. For more information on this product go to [www.protocol-forlife.com/P3059](http://www.protocol-forlife.com/P3059)

**This bottle contains an AGELESS® Oxygen Absorber to ensure freshness. Do not eat Packet.** Store in a cool, dry place after opening. Please Recycle.
