SUGGESTED USAGE: As a dietary supplement, take 1 Vcap® daily on an empty stomach, or as directed by your healthcare practitioner.

HOW IT WORKS: Nattokinase is an enzyme isolated from Natto, a traditional Japanese fermented soy food. Natto has been consumed safely for thousands of years for its numerous health benefits.* More recently, both clinical and pre-clinical studies have demonstrated that Nattokinase supports heart health and supports healthy circulation.* Each serving of Nattokinase provides 2000 FU (Fibrinolytic Units) to help keep already healthy levels of blood clotting factors within a normal range.*

CAUTIONS/INTERACTIONS: While no adverse events have yet been reported, those with ongoing bleeding problems, such as ulcers or recent surgery, should avoid taking Nattokinase because the theoretical risk of bleeding exists. People with extremely high, uncontrolled blood pressure (systolic blood pressure greater than 200 mmHg or diastolic pressure greater than 110 mmHg) should not take Nattokinase unless under strict medical supervision. Nattokinase should not be taken by persons taking "blood thinning" drugs (anticoagulants, such as aspirin or warfarin). For more information on this product go to www.protocolforlife.com/P3140.
