SUGGESTED USAGE: As a dietary supplement, take 1 Vcap® 1 to 2 times daily, preferably with meals, or as directed by your healthcare practitioner.

HOW IT WORKS: Hyaluronic acid (HA) is a naturally occurring glycosaminoglycan, which is a substance that attaches to collagen and elastin to form cartilage. HA is found in every tissue in the body, but is particularly concentrated in the skin and synovial fluid, where it functions as a lubricant.* HA not only helps keep the cartilage that cushions joints strong and flexible, but also helps support healthy joint-lubricating synovial fluid.* HA also helps to maintain skin hydration.*

CAUTIONS/INTERACTIONS: There are no known drug interactions. For more information on this product go to www.protocolforlife.com/P3155.

*These statements have not been evaluated by the FDA. This product is not intended to diagnose, treat, cure or prevent any disease.
