

SUGGESTED USAGE: As a dietary supplement, to be used as part of a short term detoxification program. Mix 2 level scoops (50 g) into 10-12 oz. of water, juice, or other liquid, or as directed by your healthcare practitioner.

HOW IT WORKS: ProtoClear™ is a protein-based nutritional supplement utilizing a vegetarian Non-GMO Pea Protein designed for use in conjunction with a comprehensive detoxification program as the cornerstone of an elimination diet.* ProtoClear™ supplies vitamins, minerals and other nutrients that support Phase I and Phase II detoxification, as well as a blend of nutrients that help to protect against the free radicals generated during the detoxification process.* The B vitamins in ProtoClear™ are in their biologically active forms, and can be taken up and used by the cells of the body, needing no conversion by the liver. The use of activated B vitamins reduces the burden on the liver and maximizes bioavailability of these nutrients.*

ProtoClear™ has Modified Citrus Pectin, a naturally sourced ingredient that has been shown to support healthy immune function and cellular health.* Medium chain triglycerides (MCTs) have been included as a healthy source of fat that is readily absorbed and utilized as energy by the body.* The pea protein used in ProtoClear™ mixes easily into liquids. Care has been taken to select ingredients that are typically nonreactive in most individuals. ProtoClear™'s balanced proportions of protein, carbohydrate, and fats help to sustain energy levels during a detoxification program.*

CAUTIONS/INTERACTIONS: If you have sensitivity to any ingredients, please check with your healthcare practitioner.

Milk Thistle may affect the liver's metabolism of alcohol, acetaminophen, butyrophenones (such as haloperidol), phenothiazines (such as chlorpromazine, fluphenazine and promethazine), phenytoin, halothane, cisplatin and cyclosporine.
