

SUGGESTED USAGE: As a dietary supplement, take 1 capsule twice daily or as directed by your healthcare practitioner.

HOW IT WORKS: Herbal Menopause with EstroG-100® is an all-natural blend of phytochemical extracts from the three herbs *Phlomis umbrosa*, *Cynanchum wilfordii*, and *Angelica gigas* Nakai. Each of these herbs has a long history of use by herbalists in Korea and China and this patented combination of extracts has more recently been clinically tested for its use in the management of menopausal symptoms. These studies demonstrated that EstroG-100® can alleviate the most common symptoms of menopause and peri-menopause such as hot flashes, night sweats, nervousness, occasional sleeplessness, and difficulty in maintaining a positive mood.* Herbal Menopause offers an alternative to isoflavones and black cohosh and only pure water is used in the extraction process.

CAUTIONS/INTERACTIONS: Not for pregnant or lactating women. *Angelica gigas* Nakai could theoretically interact with NSAIDs. If you are taking anti-inflammatory medications, consult your healthcare practitioner before using this product. For more information on this product go to www.protocolforlife.com/P3377
