

MRM's **All Natural Gainer** is an ideal health supplement for individuals looking to add useful calories to their diets as well as to increase or maintain lean body mass. All Natural Gainer makes it simple to add extra calories, in proper proportions, to a delicious beverage without the hassle of preparing another to-go meal. It was designed for all age groups and active lifestyles.

Three Essential Food Categories with Optimal Ingredients

MRM's unique protein complex provides all the essential amino acids to enhance lean muscle growth. **Natural Protein Optimizer™** is a special combination of ultra-filtered, low temperature processed whey protein concentrate, instantized calcium caseinate, crossflow microfiltered whey protein isolate, micellar casein and enzymes to provide with both immediate and sustained release of amino acids. **Natural Protein Optimizer™** provides optimal amounts of essential amino acids that growing muscles crave, especially BCAA's, Glutamine and Arginine. MRM emphasizes the amount of protein per serving since it is the most prominent macronutrient proven to increase lean muscle mass.

Additionally, MRM has added trehalose, a slow release energy substrate that renders little to no effect on insulin with maximum effect on energy and minimal fat storage. **All Natural Gainer** contains a unique carbohydrate complex consisting of glucose polymers (95% sugar free) and "low glycemic index" fructose. This preferable combination of carbohydrates provides calories that are less prone to increase "body fat" while offering a long-lasting source of energy.

Although fat is a highly concentrated source of energy (double that of protein and carbohydrates), MRM's **Opti-Fat™** blend was precisely chosen for its ability to be metabolized quickly for energy while offering unique benefits to the heart and cell membrane.** **Opti-Fat™** is an all natural fat complex that includes Medium Chain Triglycerides (MCTs), sunflower oil and omega-3 fatty acids DHA (docosahexaenoic acid) and EPA (eicosapentaenoic acid). MCTs are well known for their ability to be metabolized quickly into energy sparing protein for building lean tissue. DHA and EPA are long chain omega-3 fatty acids which are mostly deficient in the standard American diet. DHA, specifically, has been widely acclaimed for its structural benefits in brain development and cognition during adolescence and maintaining mental acuity in the elderly. Combine MRM's All Natural Gainer with a sensible diet and physical exercise program for best overall lean body mass gains.
