

ENDURANCE OPTIMIZATION

MRI EO2 VMAX™ features key ingredients and technologies, backed by emerging scientific research, to support what endurance athletes want most:

- Improved Oxygen Utilization (VO2 Max)**
- Helps maintain Optimal Circulation*
- ATP Energy Production*
- Improved Stamina & Endurance**
- Stress Adaptation/Anti-Fatigue*
- Antioxidant Defense*
- Immune Strengthening*

PROACTIVE PERFORMANCE OPTIMIZATION

During a competition, each athlete's performance is a direct reflection of his or her pre-race preparation. Those with a proactive approach to training and nutrition become quickly apparent – they are the ones ahead of the competition, and by a wide margin.

EO2 VMAX is the ideal choice for "proactive", endurance-optimizing supplementation. Taken daily, EO2 VMAX helps to build the body's endurance capacity for peak performance. EO2 VMAX supports nutrient-circulating blood flow, helps improve VO2 Max, nutritionally builds ATP stores, helps build stamina and endurance, and helps the body adapt to stress and fight fatigue.*

THE NITRIC OXIDE - ENDURANCE CONNECTION

EO2 VMAX features nitric oxide (NO) elevating ingredients for a truly novel approach to endurance support. NO is a powerful regulator of optimal circulation, nutrient delivery to working muscles, and tissue repair. However, NO may play an even greater role in endurance-specific performance. Emerging research reveals that NO plays a key role in regulating endurance muscle power, may help extend the time to exhaustion during exercise, and may help alter the oxygen (O2) cost of exercise (support improved VO2 Max).*

DIRECTIONS AND SUGGESTED USE:

Training/Maintenance Phase: Take three (3) tablets every morning with food or juice.

Competition Loading Phase: Take three (3) tablets of EO2 VMAX with food or juice 2 times per day (total of 6 tablets daily) for 4 days prior to competition.

WARNING: Not intended for use by individuals under the age of 18 years. Do not use if you are pregnant or nursing. Do not exceed the recommended dose. Consult your healthcare professional prior to use if you have or suspect a medical condition including cardiovascular disease, high blood pressure, asthma, kidney or liver disease, diabetes or cold sores, are taking prescription drugs, or have allergies to arginine, corn, gluten or citrus fruit. Accidental overdose of iron-containing products is a leading cause of fatal poisoning in children under 6. Keep this product out of reach of children. In case of accidental overdose, call a doctor or poison control immediately. Drink a minimum of 64 ounces of water per day while using this product.
