

HeartBlū Healthy Heart Support contains **pTeroPure® Pterostilbene**, a pure form of the all-trans pterostilbene found naturally in blueberries. Harnessing the science behind blueberries and the superior cellular uptake of pterostilbene, HeartBlū functions as a cardiovascular supplement by helping to maintain healthy cholesterol levels.*

pTeroPure® Pterostilbene: Supports healthy cholesterol levels already within the normal range.*

Ingredients that complement pterostilbene:

Phytosterols: Phytosterols are the plant's version of cholesterol, used to support the cell membrane. They may work to help regulate cholesterol's absorption by the body because of their similar chemical structure.*

Blueberry Fruit Extract: The other polyphenols in blueberry extract naturally complement pterostilbene's beneficial effects.*
