

* Spirulina is a single cell plant from the blue-green algae species. It is rich in vitamins, minerals, proteins, anti oxidants & chlorophyll. The chlorophyll in Spirulina helps to eliminate toxins from the body and cleanses the kidneys, blood & liver. Spirulina is a natural source of Amino acids, Vitamins and Minerals as plant enzymes. Enzymes are proteins molecules that are integral part of many important systems within the body. It helps control dietary craving & acts as a mild appetite suppressant. It is widely used for weight control.
