

GENr8® Vitargo® S2 is the first and only Super Soluble form of the fastest recovery and re/fuel carbohydrate ever proven in university research studies. Where other products use maltodextrin, sugars – or even waxy or enzyme-modified starches–Vitargo S2's patented IvG technology delivers proven faster gut transit, glycemic and insulin responses, glycogen re/fueling, and performance. Vitargo S2 is 100% sugar-free.

- **Leaves the stomach quicker** 130% faster than maltodextrin + sugars – in the first 10 minutes after ingestion.¹ This leads to less stomach “distress” and faster absorbing muscle energy.
- **Gets into muscle faster** 68% faster glycogen re/fueling than maltodextrin + sugars after intense, exhaustive workouts.²
- **Boosts performance in your next workout** Up to 23% greater maximal endurance (average of 10% greater) 2 hours after exhaustive, glycogen-depleting exercise, compared to maltodextrin + sugars.³
- **Turns off muscle protein breakdown** 178% greater insulin than maltodextrin + sugars, within 10 minutes³ – the most potent, natural way to activate the anti-catabolic signals that spare muscle protein.

GENR8-Specific Research — this *actual* product is university proven in HUMANS.

University Proven

2X Faster Glycemic Rise
1.7X Faster Glycogen

GENR8® Vitargo S2™

Muscle Fuel & Recovery

- Faster Absorbing Muscle Energy
- Up to 23% Greater Post-Workout Performance
- 178% Greater Insulin Release for Anti-Catabolic Action

Natural Juicy Orange Flavor

SUGAR-FREE DRINK MIX Not a low calorie product

Dietary Supplement Net Wt. 1.7 lbs (770g)

Gluten-Free

PATENTED IvG TECHNOLOGY™

INSTRUCTIONS

Vitargo® S2™ is a different engineered carbohydrate – please follow directions closely:

HOW *In a shaker bottle*

- Fill a large shaker bottle half full (10 - 12 oz.) with water (room temp. is best).
- Add 2 level scoops of Vitargo® S2 and shake vigorously for 10-15 seconds.
- Add cold water to top and shake vigorously for 15 - 20 seconds.

In a blender

- Vitargo S2 can be combined with your favorite post-training blender concoction – protein powder, branched chain amino acids, etc. and your favorite liquid.
- For best results add 2 level scoops to a blender with water while it's on and blending.

WHEN *Before, between, or during exercise/competition*

- Mix 1 or 2 level scoops of Vitargo S2 as described above. Note that Vitargo S2's unique molecular viscosity makes it thicker than other carbohydrate drinks – experiment and see if you prefer 1 or 2 scoops. Drink to rapid fueling!

Post-training/competition/glycogen loading

- Take 2 level scoops as soon as possible after finishing. For optimal recovery, take another 1 - 2 scoops 30 - 90 minutes after your first serving. For maximal glycogen loading, take 3 servings/day.

For more detailed info, go to www.genr8speed.com. **IF YOU DON'T TRAIN, DON'T TAKE THIS PRODUCT.**
