Pro Performance® 100% Whey Protein supplies one of the highest quality and most researched proteins available.

The Benefits of Whey Protein

Protein serves as a dietary source of amino acids. The body needs amino acids to build the various proteins used in the growth, repair and maintenance of body tissues such as skin, bones and muscles.

Whey protein offers the benefits of supplying high nutritional value and branched chain amino acids (BCAA) to athletes. BCAA are essential amino acids, which are part of muscle protein. They may preserve muscle glycogen stores and help reduce the amount of protein breakdown during exercise. Additionally, the natural components of whey help to enhance the body's production of glutathione, a natural antioxidant, which may provide dietary support to the immune system. Whey also yields a high biological value, which measures usable grams of amino acids used by the body after intense exercise.

Depending on your athletic goals, your protein requirements can vary. Inadequate protein in your diet can limit muscle protein synthesis which can compromise your athletic goals. The amino acids from whey protein move quickly through the digestive system. The consumption of these proteins will result in a rapid rise in blood amino acids and stimulate protein synthesis.

Whey protein can be taken immediately before and/or after your workout to support muscle protein synthesis.

Pro Performance Quality

This advanced protein supplement is instantized making it easy-to-mix and dissolve quickly in water. It's also low temperature treated, which delivers one of the highest quality forms of whey protein.

Because the body requires protein as a source of amino acids, Pro Performance 100% Whey Protein supplementation is important for all athletes who seek an increased protein intake while working out. Pro Performance 100% Whey Protein supplies high-quality protein to meet these needs.

TYPICAL NATURALLY OCCURRING AMINO ACIDS PER SERVING:

Alanine	1550 mg	Lysine	 1770 mg
Arginine	500 mg	Methionine	350 mg
Aspartate	2300 mg	Phenylalanine	580 mg
Cystine	310 mg	Proline	1380 mg
Glutamine	3290 mg	Serine	1360 mg
Glycine	700 mg	Threonine	1580 mg
Histidine		Tryptophan	40 mg
Isoleucine†	1240 mg	Tyrosine	450 mg
Leucine†	2300 mg	Valine†	1330 mg
† Indicates Branche	ed Chain Amino A	cid (BCAA)
