

For ultimate heart protection, you need a product that addresses the full range of factors affecting cardiovascular health — not just one. Multi-Action **CardioChol®** works synergistically to:

- **Help maintain blood pressure levels** already within normal range*, with guaranteed-absorption **MicroActive® CoQ10** — which is 3x better absorbed than regular CoQ10 and is the only form clinically proven to double CoQ10 levels in 100% of users. (Other forms of “bioavailable” CoQ10 may be well absorbed by some, but poorly absorbed by others.)
- **Lower cholesterol, with plant sterols.*** Diets low in saturated fat and cholesterol, which provide a daily total of at least 0.8 grams of plant sterols, may reduce the risk of heart disease. CardioChol supplies 2 grams of plant sterols per day — the amount found effective in a recent meta-analysis of 20 studies.
- **Promote clean, flexible arteries,** with resVida® resveratrol, providing 98% transresveratrol bioidentical to the resveratrol found in red wine.* A human clinical trial found 30 mg of resVida per day promoted arterial flexibility.*
- **Support healthy blood flow to the heart,** with arjuna bark.* Two human clinical trials have demonstrated that arjuna, at a dosage of 500-600 mg daily, supports healthy blood flow to the heart.*

*These statements have not been evaluated by the Food & Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.
