

BLUE LIGHT DEFENSE FORMULA

WHAT IS BLUE LIGHT?

Blue light, another name for high-energy visible (HEV) light in the blue and violet part of the light spectrum, is a particularly intense light wave emitted by many modern electronics- including computers, tablets, TV's and smart phones- and even compact fluorescent light bulbs. With today's increased use of electronic devices, the population is being exposed to more sources of blue light than ever before and for longer periods of time.*

HOW CAN BLUE GUARD™ HELP?

Our eyes are bombarded with daily assaults from electronic devices, therefore protecting our eyes becomes very important. BLUE GUARD™ supplements with Lutemax® 2020 have Lutein and Zeaxanthin isomers in a unique combination, which support our eyes by filtering high energy blue light, reducing glare sensitivity, support speed of visual processing and support contrast sensitivity.** BLUE GUARD™ supplements taken daily will help strengthen, filter and defend against blue light's harmful effects.

Strengthen

Increases the natural density of the macular pigment, which is the protective layer in your eyes.**

Defend

Potent Antioxidants help protect against oxidative stress to defend against the harmful effects of blue light.**

Filter

Filters out high energy blue light stopping much of the light as it reaches your macular pigment.**

Lutemax
LUTEIN & ZEAXANTHIN

With Lutein and Zeaxanthin ingredients, clinically tested for healthy vision.**

BLUE LIGHT IS ALL AROUND US.

TV

Newer televisions use LED back light technology. These LED's emit strong blue light waves.

LightBulb

Modern energy efficient light bulbs and Fluorescent bulbs emit a significant amount of blue light.

Mobile Devices

Mobile devices such as cellphones and tablets also utilize LEDs which emit blue light waves.

Promotes healthy vision
which is essential at any age.*
