

Polarity Balance

These two natural products have been brought forward for the balancing of our polarity. Even though they are known for this special use, it seems that no one really recommended the use and especially the frequency and amounts actually needed. Just about everyone that is out of sorts, i.e., tired, has what is called "reversed polarity" or is, as Keith calls it, "switched." He came up with a good term and explains in his teachings that, if you take the battery cable off their positive and negative posts and switch them, the battery will fail and possibly explode. We are better made than a battery and can exist for years this way and still function. Even though we take herbs and vitamins, we are often sick, and we can't seem to feel as well as others who use them for better health.

Spirulina is an herb food and man can exist on it alone, if necessary. It is known as a miracle food and is one of the cleanest, most natural and sterile foods found in nature. Spirulina is the highest natural source of Vitamin B-12. Beta Carotene, as Gamma Linolenic Acid, contains most of the Amino Acids. It contains four times the protein of beef and contains twenty-six times the Calcium of milk. The list goes on and on. It can help boost the immune system and assists in curbing the appetite. It also helps keep the body toned and alert. Spirulina with Bee Pollen is a high energy tonic, blood cleanser and builder. Bee Pollen can be effective for many of the above uses. *
