

The Thyroid

The thyroid is our emotional gland. It is fragile and can influence our behavior and actions. There are two conditions that can cause us many problems. One is Hyper Thyroid; this is when the thyroid gland produces too much hormone, resulting in an overactive metabolic state. The body's processes, including digestion, speed up. Mal-absorption occurs, so a proper diet is important. The symptoms could be irritability, nervousness, increased perspiration, fatigue, weakness, insomnia, weight gain or loss, heart tremors and rapid heartbeat. The pituitary, parathyroid and sex glands can also be affected.

This formula does not claim to treat hyperthyroidism or hypothyroidism but was formulated to help support general thyroid health.

Bladderwrack- Helps in balancing the thyroid. Bladderwrack is a fine source of minerals and iodine, which increases the metabolism. It helps with weight loss, and hot flashes.

Dulse- Is helpful for the endocrine system. It is very high in minerals, helps balance thyroid, is high in iodine and is helpful for weight loss.

Irish Moss- is an organic source of iodine. It helps absorb toxins and radiation from the body. Irish Moss helps reduce appetite and is a protector to all glands and lungs.

Black Walnut- Is another source of organic iodine that can support the thyroid. It helps to burn excessive toxins, maintain already healthy sugar levels. Only a small amount is used for its synergistic effect with other herbs.

Sarsaparilla- Is very effective for the endocrine system. Only a small amount is in this formula so both men and women can be helped with their hormones; that in turn can help the thyroid. It can also assist the body and other herbs in removing heavy metals.
