## CLINICALLY PROVEN WEIGHT-LOSS

Lose up to 14 Pounds & keep it off!

In a published, double blind, placebo controlled, clinical trial, subjects consuming just one of the key components in WeightOFF<sup>®</sup> lost an average of 11 lbs. and 33% of subjects actually lost 14 lbs. in just 60 days! This was 100% more weight loss than the placebo group who lost an average of 5 lbs. Both groups consumed a calories controlled diet.

## THE FORMULA

It's simple: weight loss is all about how many calories you consume versus how many calories you burn daily. If you burn more calories than you take in, you will lose weight! That's why WeightOFF<sup>®</sup> includes two breakthrough proprietary complexes that not only help you burn more calories and feel less hungry but actually help you target your fat stores.\* Here's how:

- 1. Slim-Force™** - A Clinically Proven FAT-TARGETING-TECHNOLOGY that helps force your body into a fat-burning state by supporting thyroid health and blocking carbohydrates.\*
- 2. LipoGlow™** - A Clinically Proven RELEASE & BURN TECHNOLOGY that helps increase calorie burning while making you feel less hungry, resulting in a calorie deficit state and greater fat loss!

## THE RESULTS - 100% more WeightOFF

In a clinical research study, subjects using just one key nutrient in WeightOFF<sup>®</sup> lost an average of 11 lbs, and up to 14lbs, in only 60 days! This was 100% more weight loss than the placebo group! By simply taking 2 capsules of WeightOFF daily, you can expect to lose 2 times more weight than with just dieting alone. That means if you could lose 10 pounds through dieting, you could lose 20 pounds just by adding WeightOFF!

## BURN FAT NOT MUSCLE!

Amazingly, test subjects improved lean body composition with WeightOFF<sup>®</sup>. This means test subject's lost PURE body-fat, NOT calorie burning muscle! This benefit helps you maintain a healthy metabolism and improves your chances of maintaining your weight loss results with WeightOFF.\*

## THE SCIENCE

WeightOFF<sup>®</sup> is based on several published, peer reviewed, human clinical studies, including a placebo-controlled study conducted on fifty overweight male and female subjects showing significant weight loss in just 60 days. In a second study, ten healthy human subjects significantly increased calorie expenditure and fatty acid oxidation in a 24 hour period. In a third study on 24 male and female subjects, daily food intake was significantly reduced by 12%-14%. Overall subjects using WeightOFF<sup>®</sup> burnt more calories, ate less food, and lost significantly more weight when compared to placebo groups!
