L: PHOENIXV4

Directions: Take 3 capsules with your first meal of the day, followed by 2 capsules with a later meal. To maximize effectiveness, combine with caffeine.

PHOENIX's caffeine-free formulation helps you burn fat in three different ways: it dramatically increases metabolic speed, it amplifies the power of fat-burning chemicals produced by your body, and it increases the feeling of fullness from food. If you want to lose fat faster and experience the type of fat burning power that only clinically effective dosages of scientifically validated ingredients can deliver... and if you want to do it without pumping yourself full of stimulants or potentially harmful drugs... then you want to try PHOENIX today.*
