Enzyme-Hydrolyzed for Rapid Absorption

FrogFuel is naturally hydrolyzed with a proteolytic (fruit) enzyme (not heat or acids) to a molecular level of 2000-5000 daltons. This means our protein is assimilated rapidly and almost instantly through the gut and into the blood stream. Even people with a compromised digestive tract easily assimilate FrogFuel.

Due to the extremely high degree of hydrolyzation the taste may be slightly bitter or tart.
