Science of FrogFuel™ Ultra*

Protein - Carbohydrates - Electrolytes - Beta-Alanine - Citrulline Malate - Taurine - 80mg Caffeine

Enzyme-Hydrolyzed Collagen Protein*

- Lean muscle growth and recovery
- Joint health
- Fruit enzymes are used to break down the peptide bonds in the protein
- Since FrogFuel protein is broken up at the molecular level it is absorbed easily and immediately

Simple & Complex Carbohydrates*

- Provides energy to fuel muscle contractions
- Prevents muscle tissue from being broken down to make glucose for energy

Electrolytes*

- Potassium, Sodium, Calcium, and Chloride in proprietary ratios for maintaining proper fluid balance and muscle function

Beta-Alanine*

- Not found in proteins, helps prevent acid buildup in muscles
- Benefits include increased muscle mass, strength, and power output
- Increases endurance and helps delay onset of muscular fatigue

Citrulline Malate*

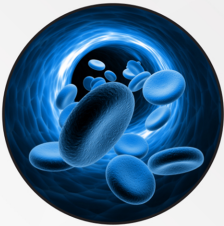

- A critical amino acid that assists in tissue health and repair
- Helps remove excess ammonia from the body, delaying fatigue and improving recovery

Taurine*

- When combined with our protein, taurine acts to quickly open the cells allowing the protein to enter and quickly rebuild muscle and improve recovery
- Reduces oxidative stress under extreme physical exertion where lactic acid builds up
- Helps regulate osmotic balance in muscle cells

Enzyme-Hydrolyzed for Rapid Absorption

FrogFuel is naturally hydrolyzed with a proteolytic (fruit) enzyme (not heat or acids) to a molecular level of 2000-5000 daltons. This means our protein is assimilated rapidly and almost instantly through the gut and into the blood stream. Even people with a compromised digestive tract easily assimilate FrogFuel.

100% Protein Digestibility <15minutes*
