

30% Increase in Muscle Strength*

The unique protein blend includes an anabolic module of 20 grams of whey protein and 0.5 grams of leucine that was clinically tested in an 8-week study of athletes performing an intense resistance exercise training regimen. The athletes using this proprietary module of whey protein and leucine demonstrated an increased improvement in muscle strength and muscle size as compared to those performing the same exercise training regimen who did not consume the proprietary module. In a clinical study of participants using a unilateral lower limb resistance training protocol, even the untrained limb demonstrated increases in muscle size.*

30% INCREASE IN MUSCLE STRENGTH COMPARED TO PLACEBO*

*An 8-week study of athletes performing an intense resistance exercise training regimen demonstrated that those using the proprietary module of whey protein and leucine had greater increases in muscle strength and size than those on placebo.

Increases Muscle Strength and Stamina with Half the Sets*

In a clinical study using a reduced volume resistance training protocol, the anabolic module in Amplified WheyBolic Extreme 60™ Original has been clinically shown to provide the same gains in maximum muscle strength and stamina doing one set while using Amplified WheyBolic Extreme 60™ Original when compared to two sets of the same amount of training without supplementation.*

**1 SET + AMPLIFIED WHEYBOLIC EXTREME 60™ ORIGINAL = 2 SETS

*When used in conjunction with an exercise program. As with any food product, use of this product alone will not lead to increased muscle mass or strength.

*Inclusion of these enzymes resulted in a 10% greater protein breakdown as measured by the release profile of the amino acid tyrosine. These results represent the enzyme activity present under simulated conditions. Effects in the human body have not been studied.

*Per 2 scoop serving.

KEEP OUT OF REACH OF CHILDREN.

Store in a cool, dry place.
