

A-AKG, Arginine Alpha-Ketoglutarate helps attain a deeper level of training to help provide sustained muscle growth in a shorter timeframe. It helps increase nitric oxide (NO) production, resulting in vasodilation. Additionally A-AKG helps to process the ammonia created by intense muscle activity and create glutamine which is important for energy and muscle recovery. A-AKG helps increase workout performance, which may result in increased muscle mass.\*

OLYMPIAN LABS, INC. products are made with the highest quality ingredients and manufactured according to current Good Manufacturing Practices (cGMP).

CAUTION: If you are pregnant or nursing, have a medical condition, or are taking medication, consult your healthcare professional before using this or any other nutritional supplement. Discontinue use if allergic reaction occurs.
