Q. Why should I take B12 Strips instead of a pill or

liquid? A. When you take a supplement in a digestible form,

any B12 present is absorbed by tiny proteins in the stomach and intestines that bind B12. As a result. only a small percentage of any form of B12 makes it into your bloodstream.*

Q. Why should I choose Methylcobalamin over Cvanocobalamin B12?

A. Methylcobalamin is the most efficient form of B12. Before Cyanocobalamin can be properly utilized by the body, it has to be stripped down in a time consuming, multi-step process. Methylcobalamin is already the most highly reduced form, allowing a high level of benefit.*
