Dietary Supplement

30 Day Supply

TriActive Biotics Daily Care Featuring

TriActive Biotics Bac⁵ Activity is
a process by which the probiotic is
delivered to the acidic environment
of the stomach to balance the pH, and
discourage the growth of unfriendly
bacteria. It also causes bacterial
multiplication for the protected probiotic
blend, which is delivered safely to the
intestine through microencapsulation.
Microencapsulated probiotics have
been shown in human clinical trials to
colonize/adhere up to 5x better
than typical or uncoated strains.
