CARDIOVASCULAR, ENERGY AND MUSCLE FUNCTION FORMULA*
Potentiated Magnesium (pMg) is an advanced form of the essential mineral magnesium (Mg), featuring Maxcelint Uptake for enhanced intestinal absorption and optimum cellular utilization, and is the same advanced form of magnesium used in the following patents: U.S. 5,849,337, U.S. 6,372,264 (www.uspto.gov), Canada 2,295,108, China 02,828,726.6, Japan 3,622,985 and European Union patents pending. Potentiated Magnesium supports and helps maintain the balance, stability, structural integrity and normal function of the cardiovascular system, cellular function, energy production, muscle function, bronchi function, and balances calcium metabolism. pMg is magnesium at its full potential.* The essential mineral zinc with pMg enhances and supports the immune system, reproductive system, energy production, and strengthens exercised muscle function.*

READ ENTIRE DIRECTIONS AND FOLLOW CAREFULLY

DIRECTIONS: As a dietary supplement for adults, with water take two (2) to eight (8) tablets daily, in divided doses, with meals and at bedtime, or as recommended by a healthcare practitioner. **Important:** Do not exceed more than 100 mg of supplemental zinc per day. First-time users, *very gradually* increase dose over a period of three or four weeks. May be beneficial to take dietary fiber, especially psyllium fiber, on a daily basis. If pregnant or lactating, or otherwise under the care of a physician, or a medical condition exists, especially compromised kidney or digestive tract function, or sensitive to any ingredient, consult your doctor before taking. Benefits are continued daily dose dependent.
