

Herb Specialists Since 1972

Immune System Support

Uña de Gato/Cat's Claw herb grows in the rain forests of Peru where the inner bark containing the beneficial factors is gathered without destroying the plant, maintaining the fragile ecological balance of the rain forest. Native Ashaninka Indians have relied on its benefits for centuries for a wide variety of health concerns. Current research indicates it may play a valuable role in supporting the body's Immune System, and is combined for synergistic action in this formula with the immune-enhancing echinacea and astragalus.*

RECOMMENDATION

Take one capsule daily with a meal.

WARNING: Not for use by pregnant or lactating women.
