Strong Bones Require More Than Calcium*

The best ratio of calcium to magnesium: you, yes, need calcium—but it's only effective when combined with other minerals and nutrients. **OsteoStrong™** features a 2:1 ratio of calcium to magnesium—the right proportion for building strong bones.*

Minerals that absorb: Minerals can be difficult for the body to use. **OsteoStrong** features **TRAACS®** minerals, chelated to the amino acid glycine, for the best absorption and benefits. They are sophisticated minerals that promote healthy bone density.*

MenaQ7®: This clinically studied form of vitamin K2 helps facilitate mineral absorption into the bone.*

Probiotics for healthy bones: *Lactobacillus sporogenes* is a probiotic that yields lactic acid, creating a better environment in the intestines to promote greater mineral absorption, particularly of calcium.*

Easy to swallow: A smooth coating on each tablet makes them easy to swallow.

The OsteoStrong™ Advantage

Bone requires a variety of nutrients in addition to calcium, including vitamins, macro minerals, amino acids and trace minerals. **OsteoStrong** is a unique formula that contains the necessary nutritional components to maintain strong, healthy bones. With **OsteoStrong**, you will be protecting your bones for life.*

† Adequate calcium and vitamin D throughout life, as part of a well-balanced diet, may reduce the risk of osteoporosis.
