

Directions: As a dietary supplement for children three years of age and older, take one chewable wafer daily or as directed by a healthcare practitioner. **Caution:** To be chewed only. Not intended to be swallowed whole.

If children grew up in the rainforest, they'd get the most of the nutrients for digestive and immune health from whole foods like fruits, vegetables, whole grains and fish. Nutrients that are often missing from today's diets. **Bluebonnet's Super Earth® Rainforest Animalz® Probiotic** helps to bridge the gap by providing their tummies with the clinically studied probiotics, DDS-1 strain (a highly stable super strain of L-acidophilus) and bifidobacterium bifidum, delivering over 1.5 billion viable microorganisms at the time of manufacturing in one yummy chewable wafer. ♦
