The key botanical in Adrenal Response is Sensoril[®]. Sensoril is an extraordinary extract of the revered Ayurvedic botanical, Ashwagandha (*Withania somnifera*). Sensoril is produced from the roots of plants less than two years old, using a water-based process that guarantees optimal concentrations of several key constituents. These constituents include: withanolid glycosides, oligosaccharides and withaferin-A in concentrations clinically shown in double-blind, placebo-controlled clinical trials, to support a healthy response to stress and help to ward off fatigue.*
