Healthy digestive function is the first critical step for the body to absorb and utilize vital nutrition from the diet. There are many factors which can negatively impact the body's ability to properly break down and absorb both macro and micronutrients contained within food. Digestive Enzymes Clinical Strength delivers a full spectrum of enzymes, including those that our body does not produce, in order to promote the optimal digestion of dietary proteins, fats, complex and simple carbohydrates, including hard to digest plant fibers. Taken as directed, this formula may also help provide relief from occasional common digestive complaints including gas and bloating.*

Purity Promise: Free of Gluten, Dairy, Soy, Herbicides and Pesticides.
