

Smart Blend® is a precise blend of "smart fats" or healthy fats. We combined exact amounts of DHA, EPA, CLA, and GLA to build a fatty acid complex that supports weight management, cardiovascular and immune health.** Eating the Standard American Diet (SAD) creates an imbalance in our fatty acid "pool" and leads to our system performing poorly. Regular supplementation with **Smart Blend®** can help support a balanced lipid pool which is required for whole body balance and cellular function.**

Eicosapentaenoic (EPA) and Docosahexaenoic (DHA) are Omega-3 fatty acids that are necessary for cardiovascular, joint, and cognitive health.** The precise ratio of EPA and DHA made from only the highest performance fish oils make the backbone to **Smart Blend®**, providing structure and function for better system performance.**

Conjugated Linoleic Acid (CLA) is a beneficial fatty acid commonly found in meat and dairy products, but it is actually difficult to get an effective amount through diet alone. CLA is an essential part of a healthy lifestyle with regular exercise and a balanced diet.**

Gamma Linolenic Acid (GLA) is an Omega-6 fatty acid that is good for you by supporting your body's natural protective healing process.** While balancing out the fatty acid profile for **Smart Blend®**, GLA supports cardiovascular, joint, and immune health while eliciting powerful antioxidant activity.**
