

Glucosamine Sulfate (GS) is a sugar and nitrogen compound found in high amounts of synovial fluid and connective tissue.

Chondroitin Sulfate (CS) is a similar molecule also found in high concentrations in joints and connective tissue. Together, these two compounds offer key building blocks in cartilage to promote joint mobility, flexibility and comfort.**

- 1500 mg GS/ 1200 mg CS
- Supports joint mobility**
- Assists connective tissue**
