

Directions: As a dietary supplement, take one vegetarian softgel daily, preferably with a meal or as directed by a healthcare practitioner.

Bluebonnet's CellularActive® CoQ10 Ubiquinol Vegetarian Softgels contain 200 mg of the "active" antioxidant form of CoQ10 (*ubiquinol*) rather than the popular, oxidized form (*ubiquinone*), which must be converted to ubiquinol in the body. Aging, intense training and certain medications like statins compromise the levels and/or natural production of CoQ10 in the body, as well as the conversion of *ubiquinone* to *ubiquinol*. That's specifically why athletes and seniors benefit from ubiquinol supplementation. Available in easy-to-swallow vegetarian softgels for maximum assimilation and absorption. Soy-free and suitable for vegetarians.♦
