

Help keep your digestive system healthy with beneficial probiotic bacteria.*

Our bodies need beneficial bacteria for numerous vital body functions including healthy digestion.[†] But sometimes bad bacteria flourishes, causing an imbalance of good bacteria in the intestinal tract. When this happens, your digestive health is disrupted, which may result in digestive upsets.

Probiotics are beneficial bacteria that help promote a healthy intestinal microflora.[†] This good bacteria can help to maintain the balance of good bacteria in your digestive system, while supporting a healthy immune system.[†]

Equate Digestive Health Probiotic contains 10 billion active cultures of *Lactobacillus rhamnosus* GG, one of the most studied probiotic strains. When taken daily, our formula can help promote gastrointestinal health and support your body's immune system.[†]

Stress, travel, aging and bad diets can disrupt your body's digestive system balance. Probiotics are the "friendly" bacteria that are helpful for several vital body functions including healthy digestion and immune health.[†]
