

PROLAB® Amino 2000™ supplies hard training athletes and bodybuilders with a full spectrum of growth and recovery-supporting amino acids. Each dose delivers a massive 2,000 mg of pure, naturally occurring free form amino acids per tablet that help build, protect and maintain lean muscle tissue. To further support lean mass development, each dose of **PROLAB Amino 2000** delivers 8 grams of high quality whey protein concentrate. Athletes require greater intakes of protein to ensure plenty of amino acids are supplied to muscles - supporting a positive nitrogen balance. A positive nitrogen balance is necessary in order to promote protein synthesis and muscle growth. Amino acids are the building blocks of muscle for new growth and rebuilding muscle tissue after intense training.* You do your part. We'll do ours.™
