

Cardio Chelate™ is an arterial support formula based on the well researched compound ethylenediaminetetraacetic acid (EDTA), which has shown in clinical studies to bind metal ions in the arteries and veins through its powerful chelating capability.** Methyl-Sulfonyl-Methane (MSM) and N-Acetyl-Cysteine (NAC) are two sulfur-donating compounds that increase cellular glutathione concentrations, which is important for increased antioxidant needs.** Along with Vitamin C, these compounds work together to provide optimum nutritional support for cardiovascular health.**

- **Balances metals within the body****
- **Supports cardiovascular health****

NOTE: For optimal benefits take Cardio Chelate™ at least 2 hours before or after meals and away from a multimineral.
