

As we age, many biosynthetic pathways diminish and we experience the effects of hormonal insufficiencies. Supplementing with **Pregnenolone** can support hormone levels and healthy aging.**

Pregnenolone is naturally produced in the body. Its main role is as a progenitor hormone for the biosynthesis of other hormones (such as Progesterone, DHEA, cortisol and other sex hormones).** **Pregnenolone** itself, also has substantial neurocognitive (brain processing) effects.**

- **Micronized for Superior Absorption****
- **Achieve Natural Balance****

WARNING: Do not take with barbiturates or alcohol. Do not use if under the age of 18, pregnant, nursing or suspect a medical condition.
