

Melatonin is a hormone that is produced by the pineal gland in the brain. Its secretion is determined by light and seasonal patterns which dictates the circadian rhythms (sleep/wake cycle) of the body. Supplementation has produced remarkable benefits in individuals who work night shifts, travel across multiple time zones or have difficulty sleeping.**

- **Supports Normal Sleep Patterns****
- **Dictates the Circadian Rhythms (Sleep/Wake Cycle)****
- **May Reduce the Effects of Jet Lag****
