

Silymarin is the active constituent from Milk Thistle (Silybum marianum) Extract and has long been shown to be effective in purifying the liver of toxins.** However, new findings indicate that most commercial brands of Silymarin are poorly absorbed in the bloodstream due to the nature of the compound. **BioSorb™** offers superior absorption for maximum benefits.** In fact, human studies show enhanced peak silymarin blood concentrations of 290% in just 1.5 hours after oral intake of **BioSorb™**. Even more impressive, concentrations remained elevated by 342% for 12 hours.**

- Supports liver health**
- Enhanced absorption technology
- 5x greater bioavailability!**
