

TribuPlex® 750 is a potent steroidal saponin and adaptogen complex. This complex is built upon a combination of Tribulus alatus (standardized to 54% steroidal saponins) and Tribulus terrestris (with an unheard of 60% steroidal saponins). Clinical studies have shown these steroidal saponins are building blocks that evoke dramatic effects upon anabolic hormone production without the use of anabolic steroids.**

This formula is further complemented by a synergistic, blend of concentrated extracts of Diosgenin and Trigonella foenum. Clinical research supports that plant derived steroidal saponins may support healthy human hormone levels.**

- **Supports healthy hormone levels****
- **May increase libido and help build muscle****
- **Adaptogens may support energy and endurance****
