

Balanced Non-denatured Whey Protein Complex
MRM's Low Carb Protein delivers a unique source of amino acids by combining an ultrafiltered, low temperature processed whey protein concentrate, with cross flow microfiltered whey protein isolate and L-glutamine. This blend offers a high biological value, easily digestible supply of amino acids into the bloodstream without high amounts of carbohydrates. This allows for high amino acid concentrations in the blood which can help nitrogen retention. **Low Carb Protein** is also remarkably high in Branched Chain Amino Acids (BCAAs), which are the most required amino acids needed to replenish muscle stores that are utilized during strenuous exercise.**

The Next Generation Protein
The biochemists at **MRM** have taken protein supplementation to the next level, without the worry of wasting ingested protein. The addition of **Digest-ALL® AP** helps breakdown long and short chain amino acids into smaller, more readily absorbable amino acids for maximum digestion and absorption.** Some concerns with the popular “high protein diet” used by many bodybuilders and dieters is that the body is unable to naturally digest high amounts of protein at one time. **Digest-ALL® AP** helps the body release more amino acids from ingested protein than digestive enzymes alone.** When men, women, seniors as well as athletes of all ages and sports take **Low Carb Protein** enhanced with **Digest-ALL® AP**, the body can absorb more amino acids directly into the bloodstream to help increase muscle size, strength and lean body mass.**

Each scoop of **Low Carb Protein** provides 23g of a unique protein blend of undenatured and easily digested and absorbable protein. This formula was designed to provide your muscles with all of the essential amino acids required for maximum muscle strength and development. **Low Carb Protein** mixes instantly, tastes delicious and is free of artificial flavors, artificial sweeteners and is also gluten free.

NATURAL

LOW CARB PROTEIN

23g of Protein
Only 2g of Carbs

Antibiotic &
Hormone Free

With Digestive
Enzymes

FRENCH VANILLA

NET WT 28.6 oz (1.78 lb) 810 g
DIETARY SUPPLEMENT

Directions: Add one slightly heaped scoop of Low Carb Protein to a 3-4 oz. glass of cold water, milk or juice. Protein supplementation is recommended between meals or immediately following your workout. Low Carb Protein mixes instantly, no blender or shaker required.
Low Carbohydrate Diet (Weight Management Program): A recommendation of 1 scoop per day for those trying to increase their dietary protein intake while decreasing intake of carbohydrates.
