

Whey Protein Isolate goes through a delicate and precise filtration process to effectively remove excess amounts of fats, cholesterol, and carbohydrates, resulting in a non-denatured protein. In general, these powders will contain a higher percentage of protein compared to Whey Protein Concentrate - generally around 90% protein. These are best utilized immediately after a workout and first thing in the morning when fast-acting protein is needed most.

MRM's **HBV (High Biological Value)** blend contains quality whey protein isolate and vegan enzymes. Each serving contains 24 grams of highly digestible protein (high in BCAAs), zero fats, and only 4 grams of carbohydrates per serving. All this high quality nutrition gets delivered in a clean formula, utilizing natural sweeteners and natural flavors for a great tasting shake.

Digest-ALL® AP is a vegan friendly proteolytic enzyme blend containing bioactive peptidases, which can actively digest protein over the wide range of pH that is found in the gastrointestinal tract.** **Digest-ALL® AP** aids the body's ability to convert proteins to higher peptides or free amino acids for health and fitness, ultimately leading to better absorption and lean muscle gains.**
