

Directions: Adults take four capsules per day with food or as directed by your healthcare practitioner.

Caprylic Acid is a short chain fatty acid, which has anti-fungal activity in the intestine but does not have negative effects on the normal gut microflora.* This formula beneficially delivers caprylic acid in a naturally sustained released form to the small and large intestine.* Efficacy of caprylic acid has been demonstrated in both clinical and in vitro studies.* The exact mechanism of fungicidal action is not fully understood; however, it is believed that caprylic acid dissolves in the cell membrane of yeast causing changes in fluidity and permeability that lead to membrane disaggregation.*

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

Caution: Keep out of reach of children.

Storage: Keep tightly closed in a cool, dry place.

This Formula Meets or Exceeds cGMP Quality Standards.
