

POTASSIUM

Potassium is one of the major electrolytes and minerals in the body. It is essential to all organisms and is the major cation (positively charged ions) in the cell cytoplasm with a wide variety of electrochemical and catalytic functions for enzyme systems. With sodium, the other "electrolyte," potassium participates in the maintenance of normal water balance, osmotic equilibrium and acid-base balance. Potassium participates with Calcium in the regulation of neuromuscular activity.

Mixing Instructions: Mix with 8 to 10 ounces of juice or water.

In processing, FDA & GMP guidelines are observed and strictly followed.

Disclaimer: This product is not intended to diagnose, treat, prevent or cure any disease.
