

New research studies show that chlorogenic acids, a compound extracted from green coffee beans, can help you support metabolism and maintain healthy blood sugar levels already in the normal range. Though coffee has long been thought to have fat-burning properties from caffeine, this new research has identified that chlorogenic acid may also be responsible.*†

† Use as part of a reduced-calorie diet and exercise program.

Does not contain: Soy, wheat, yeast, lactose, citrus, milk, egg or fish products, sugar, salt, starch, artificial coloring, flavoring or preservatives.
