Easier to swallow tablets²

We know that taking big pills every day can be a challenge. That's why we have developed easier to swallow, smaller tablets than other leading joint care brands². Our exclusive state-of-the-art technology allows us to pack the same amount of our powerful ingredients into a smaller tablet, making it easier to take every day for the best possible results.

HOW DOES MOVE FREE® WORK?

Move Free® Advanced supports 5 signs of joint health: mobility, flexibility, strength, lubrication and comfort so you can do the things you love.*

Glucosamine:

Glucosamine is key for the formation of cartilage, an essential building block of your joints. Glucosamine also supports the mobility and flexibility you want in everyday life.*

Chondroitin:

Chondroitin is a building block of cartilage that supports joint strength by helping to resist compression in the joint. Chondroitin attracts fluid to your joints to support cushioning and lubrication.*

Uniflex® (or FruiteX-B Calcium Fructoborate):

Uniflex® is a clinically tested mineral complex that supports joint comfort in as little as 2 weeks!*

Joint Fluid (or Hyaluronic Acid):

Hyaluronic Acid is the same molecule found in healthy joint fluid that supports joint lubrication and smooth movement. As we get older, our levels of HA tend to decrease.*

Move Free® Advanced Plus MSM & Vitamin D3 also provides extra cartilage and bone support.*

Methylsulfonylmethane (MSM):

MSM is a source of sulfur found in the body that is important in the formation of collagen in joints. Collagen is a vital part of your joints because it supports the structure of cartilage.*

Vitamin D3:

Vitamin D3 helps maintain healthy levels of Calcium and Magnesium, important minerals that support strong bones. Because joints receive their essential nutrients through their adjoining bones, healthy bones are key for healthy joints.*
