

Liver Support was formulated specifically to support the Liver Function. The Liver has the ability to regenerate its entire cell mass approximately every 50 days. The liver is the largest internal organ and plays a vital role in our health performing many complex functions that are essential for life. As much as 80% of the liver cells can be dysfunctional before you even know it's in trouble.

Your liver purifies your blood. The liver is designed to remove toxic matter such as dead cells, microorganisms such as bacteria, fungi, viruses and parasites, as well as chemicals, drugs and particulate matter from the blood stream. Liver Support also helps with weight loss.

Directions: Take 2 capsules in the morning before a meal and 2 capsules in the evening prior to your bed time.
