- Protein Powder of the Year Winner for 11 Consecutive Years

*Based on calculation that 1 serving equals 1 workout recovery. Number of servings calculated based on total pounds sold divided by average servings per pound.

THE TRUE STRENGTH OF WHEY

Whey protein is popular with all types of athletes because it digests rapidly and contains all of the Essential Amino Acids. The primary ingredient in Gold Standard 100% Whey™ is Whey Protein Isolate which has had much of the carbs and fat "isolated" out, so you get quality protein support for achieving your fitness goals. Our superior quality powder mixes easily in a shaker cup or using a glass and spoon, in addition to making great smoothies.

BEYOND THE BASICS

- Ultra-Filtered Whey Protein Concentrate
- Naturally Occurring Branched Chain Amino Acids (BCAAs) for Muscle Support & Recovery
- 1 Scoop = 1 Serving = 24g of Complete Protein
- For Optimal Results Use Within 1 Hour Before or After Exercise

DIRECTIONS:

SPOON STIRRED: Gold Standard 100% Whey™ is instantized. That means if you forgot your shaker cup or don't have time to get out the blender, just add one scoop of Gold Standard 100% Whey™ to a glass filled with 6-8 fl oz of water or your favorite beverage. Then mix it up with a spoon. Stir for about 30 seconds or until powder is completely dissolved. TIP: Adjust the taste of your Gold Standard 100% Whey™ by varying the amount of liquid that you use to prepare it. For a bolder flavor with slightly more body and sweetness, mix each scoop with 4-6 fl oz of water, milk, or your favorite beverage. For a milder tasting, less sweet shake, use 8-10 fl oz of liquid per scoop.

SHAKER CUP: Bringing a shaker cup with you to the gym is the best way to get a dose of protein immediately after your workout. Just pour in 6-8 fl oz of your preferred beverage and then add one scoop of Gold Standard 100% Whey™ to your shaker cup. Cover and shake for 25-30 seconds.

BLENDER: Add one scoop of Gold Standard 100% Whey™ to a blender filled with 6-8 fl oz of water or your favorite beverage. Blend for 20-30 seconds. Then add 1 or 2 ice cubes and blend for an additional 30 seconds.

SUGGESTED USE: For healthy adults, consume enough protein to meet your daily protein requirements with a combination of high protein foods and protein supplements throughout the day as part of a balanced diet and exercise program.
