Discontinue 2 weeks prior to surgery or if you experience rapid heart beat, dizziness, severe headache or shortness of breath.

BULLNOX™ is engineered to maximize training-induced muscular adaptations when partnered with new BULLRUSH™, the world's first and leading accelerator!

Use BULLRUSH™ during and/or after workouts to replace cellular substrates, compress recovery time and grow faster!

• "Anabolic Solidification": Make sure every second of training yields solid muscle gains!

• "Endocrine Ignition": Without the risk of hormonal side effects!

• "Cardiovascular Dilation": Watch your tissues expand as you train!

• "Unbeatable "Strength-Endurance": Lift more weight for more reps without "gassing"!

• "Immediate "Neural Energy": Feel BULLNOX™ working by the first set!

Feel the new BULLNOX™ Super-Set formula working set by set. Its ingredients were chosen on the basis of their potential to support:

• Immediate "Neural Energy": Feel BULLNOX™ working by the first set!

• Unbeatable "Strength-Endurance": Lift more weight for more reps without "gassing"!

• "Cardiovascular Dilation": Watch your tissues expand as you train!

Feel new BULLNOX™ working with you set by set!

Set 1 ("Andro Stimulation"):

Purpose: Support the naturally occurring testosterone response to exercise and amplify it to support a more anabolic response.† The Andro Stimulation also further enhances the "Pump" response to exercise.†

Set 2 ("Neuro-Emotive Energy"):

Purpose: Support overall neurological performance and motivation by enhancing cognitive function and decreasing the muscular pain associated with exercise.† Will also enhance and sustain energy levels during exercise without overstimulation or a drop off in performance.†

Set 3 ("Cardiovascular Dilation"):

Purpose: Increase nitric oxide (NOX) levels, blood flow and dilation/volumization of cardiovascular and muscular tissues; improve quality of pumps (faster onset, harder).†

Set 4 ("Strength-Endurance"):

Purpose: Enhance strength and power levels (increasing 1 rep maximum).† Also boosts endurance by reducing blood lactates to increase your ability to perform multiple repetitions.† The formula is designed to maximize power output while minimizing water retention.†

Set 5 ("Anabolic Solidification"):

Purpose: Increase protein synthesis, enhance exercise-induced muscle hypertrophy, increase muscle size and hardness.†
